AMBEV REPORTS 2009 SECOND QUARTER RESULTS UNDER
IFRS

São Paulo, August 13, 2009– Companhia de Bebidas das Américas – AmBev [BOVESPA: AMBV4, AMBV3; and NYSE: ABV, ABVc], announces today its results for the 2009 second quarter (Q2 2009). The following financial and operating information, unless otherwise indicated, is presented in nominal *Reais* and prepared in accordance with International Financial and Reporting Standards (IFRS), and

should be read in conjunction with our quarterly financial information for the three and six months period ended June 30, 2009 filed with the CVM and submitted to the SEC.

This press release segregates the impact of organic changes from those arising from changes in scope or currency translation. Scopes represent the impact of acquisitions and divestitures and the start-up or termination of activities. Whenever used in this document, the term “normalized” refers to performance measures (EBITDA, EBIT, Net income, EPS) before non-recurring items. Non-recurring items are either income or expenses, which do not occur regularly as part of the normal activities of the company. They are presented separately because they are important for the understanding of the underlying sustainable performance of the Company due to their size or nature. Normalized measures are additional measures used by management, and should not replace the measures determined in accordance with IFRS as an indicator of the Company’s performance. Comparisons, unless otherwise stated, refer to the second quarter of 2008 (Q2 2008). Values in this release may not add up due to rounding.

OPERATING AND FINANCIAL HIGHLIGHTS

Top line performance: Top line grew 8.8% driven by volume growth and price increases across our regions. Organic volume growth of 4.1% was a result of a 7% volume growth in Brazil, partly offset by a 3.5% volume decline in Latin America South. Canada and Hila-Ex volumes grew 2.3% and 1.1%, respectively, in the period.

Cost of Goods Sold (COGS) and Selling, General & Administrative (SG&A) expenses: COGS per hectoliter decreased by 4.3% in the quarter as expected gains on our hedges, lower commodity prices for PET and corn and productivity initiatives more than offset inflation in the period. SG&A (excl. depreciation & amortization) increased organically by 13.5% driven by higher volumes, inflation, timing of certain investments and higher accruals for variable compensation in the period.

EBITDA, Operating Cash Flow and Net income: Our Normalized EBITDA reached R\$2,383.1 million in Q2 2009, an organic growth of +13.8 % and margin expansion of 230 bps in the second quarter to 44.6%. Operating cash flow generation was R\$1,991.1 million in Q2 2009, an increase of +31.4% yoy. Our Normalized Net income was R\$1,391.4. million (+35.1%) in Q2 2009 while our Normalized Earnings per share (EPS) grew 34.6% yoy.

Payout and Financial Discipline: In Q2 2009, we paid interest on own capital (IOC) totaling around R\$262 million. Since then, we paid dividends and IOC of approximately R\$745 million beginning July 31 and declared additional dividends and IOC of approximately R\$ 1.0 billion, to be paid beginning October 2, 2009. There were no share buybacks in the quarter.

Financial Highlights - AmBev Consolidated R\$ million	2Q08	2Q09	% As Reported	% Organic	YTD 08	YTD 09	% As Reported	% Organic

Note: Earnings per share calculation is based on outstanding shares (total existing shares excluding shares held in treasury).

Message from AmBev Management

We closed the first half of 2009 with another strong quarter, delivering year to date EBITDA of R\$4,966 million, an organic growth of 15.1%, exceeding our expectations given the continuing challenges to industry volumes across the countries we operate other than Brazil, where disposable income and overall macro-economic environment remain positive. These results were only possible because of the quality of our brands, our people and our preparation for what is proving to be a challenging year in several markets.

During the second quarter, our normalized consolidated EBITDA totaled R\$2,383.1, a 13.8% organic increase with our margins expanding by 230 bps and reaching 44.6%. Consolidated volumes delivered solid growth once again and were 4.1% higher in Q2 2009.

Our Brazil business delivered another solid quarter as good industry performance and market share gains resulted in a 7% volume growth for both Beer and CSD & Nanc in the period. Our Normalized Brazil EBITDA increased organically by +8.1%, with margins expanding by 90 bps. Our results in this quarter were negatively impacted by the timing of certain investments in the market as well as higher accruals for variable compensations versus last year. We believe our year to date EBITDA growth of 12.9% versus last year is a better proxy of our performance than Q2 2009. “We are pleased with our performance in the first half of the year as we continued to execute our productivity and innovation strategies as planned despite a better than anticipated macro-economic scenario in Brazil during the period. We will continue focusing on them in order to position ourselves for profitability growth in 2009 and beyond”, says João Castro Neves, Chief Executive Officer (CEO) for AmBev.

HILA-ex reported a Normalized EBITDA loss of R\$9.9 million. João Castro Neves comments: “Although in the very early stages, I am pleased with the initiatives we have launched to move us closer to our goal of delivering break-even EBITDA in the Region”.

Latin America South continues to deliver strong results despite poor industry performance across most markets (mainly in soft drinks), contributing with Normalized EBITDA of R\$341.1 million (+37.3%) in the period. Good revenue management, market share gains and fixed cost savings on both COGS and SG&A allowed us to continue to expand margins in Q2 2009. Year to date, our EBITDA in the region grew 28.3% in organic terms. “We delivered strong performance in the second quarter despite volume decline due to the industry slowdown. We achieved this performance by gaining market share, effective revenue management, focus on the premium segments, a solid support to our mainstream brands and by rationalizing our cost structures. We expect a tough macroeconomic environment for the next quarters but we are confident our brands and our management team will continue to perform to face the challenges to come”, says Bernardo Paiva, CEO for Quinsa.

In Canada, Labatt delivered Normalized EBITDA of R\$545.7 million in the period, a 14.1% organic growth with margins expanding 330 bps. Top line growth was driven by price increases ahead of inflation and better product mix while market share gains and industry growth drove volumes up 2.3% versus last year. Higher commodities prices started to cycle out and we continue to benefit from productivity and fixed cost savings. Year to date our EBITDA grew 10.6% in organic terms. “Labatt had a strong first half of the year despite a tough economic scenario in Canada. Our performance continues to be driven by strong price management, growth in our focus brands, smart innovation and the leveraging of all cost saving opportunities,” says Márcio Froes, President for Labatt.

Overall, the results we have achieved year-to-date on our cost management initiatives together with our hedges have been important contributors to our performance in the first half of the year. Although we expect a much tougher H2 2009, particularly as some of our hedges become less favorable, we will work very hard to maintain our consolidated COGS for the full year growing flat to up low single digits in organic terms.

As we look forward to H2 2009, we remain cautiously optimistic about the outlook, as the second half of the year should be better than we anticipated earlier in the year, principally in Brazil, but still more challenging than H1 2009. Considering challenging comparisons in the third quarter due to relatively tough volume comparisons and higher expected sales and marketing investment, particularly for CSD&NANC Brazil and Canada, our consolidated year-over-year organic EBITDA growth should be lower than the one delivered in H1 2009.

Finally, EBITDA growth and operating cash flow generation remain our two biggest priorities for 2009 and we will continue to focus on our innovation and productivity plans in order to deliver our results in 2009 while positioning ourselves for the future.

Second Quarter 2009 Results
August 13, 2009
Page 4

AMBEV – CONSOLIDATED RESULTS

The combination of AmBev’s operations in Latin America North (LAN), Latin America South (LAS) and Labatt business units, eliminating intercompany transactions, comprise our consolidated financial statements. The figures shown below are on an as-reported basis.

(*) Q2 2006 and Q2 2007 data derive from BR GAAP figures and are presented just for reference purposes.

AmBev Consolidated

The following table sets forth the consolidated results of AmBev for Q2 2009 and H1 2009 (YTD09).

AmBev delivered Normalized EBITDA of R\$2,383.1 million in the quarter with margin expansion of 230 bps. Top line growth continued to exceed volume growth and our COGS/hl further improved from first quarter trends. However, investment phasing and higher accruals for variable compensations due to a very tough comparison in Brazil adversely impacted our operational leverage in the period.

Our year to date EBITDA totaled R\$4,966.0 million representing a growth of 15.1% and a margin expansion of 240bps to 45.1%.

Second Quarter 2009 Results
August 13, 2009
Page 7

AmBev Brazil

Our Brazil business unit delivered Normalized EBITDA of R\$1,506.2 million in the quarter, representing an organic growth of +8.1% and a margin expansion of 90 bps to 47.8%. Year to date our Normalized EBITDA totaled R\$3,287.4 million, increasing 12.9% versus last year.

Our performance in Brazil for the second quarter, and to a lesser extent in the first half of 2009, has been significantly impacted by a tough comp in our SG&A year over year driven by accruals for variable compensation. Although the accruals for variable compensation is a normal part of our performance, it becomes a relevant tough comp this year when taken in consideration the fact that Brazil did not receive any variable compensation in 2008 and has delivered very good results in the first half of 2009. This should not be an important driver for SG&A growth in the ordinary course of business.

Excluding our incremental accruals for variable compensation, our Brazil SG&A would have increased by 14.2% and 8.3% in the three and six months period ended in June, respectively, while our Brazil EBITDA for the same periods would have increased by 13.8% and 17.4%.

Our beer volumes in Brazil grew 7.0% during Q2 2009 driven by real growth in consumer disposable income for the second quarter in a row and market share gains. During Q2 2009, we increased our market share by 100 bps, reaching 68.3%, according to Nielsen, due to the good performance of our innovations and a more rational competitive environment in Brazil during the period.

Net revenue per hectoliter decreased 0.5% in Q2 2009. Excluding sales of malt, net revenues per hectoliter increased around 1% in the period, reflecting our price increases implemented during the summer partly offset by higher than inflation tax increases and packaging mix.

COGS per hectoliter declined 11.8% in the quarter due to more favorable currency and commodity hedges, lower corn prices and our productivity initiatives in the period, partly offset by general inflation.

SG&A excluding depreciation and amortization increased +30.4% organically in the period due to volume growth, general inflation, higher expenses from channel mix, timing of certain investments and higher accruals for variable compensations.

Beer Brazil Normalized EBITDA increased by +0.8% reaching R\$1,209.7 million in the quarter with year-to-date organic growth reaching 9.7%.

Our CSD&Nanc Brazil business posted organic volume growth of 7.0% in the period driven by real consumer disposable income growth and market share gains of 40 bps in Q2 2009 in reaching 17.8%.

Net Revenues per hectoliter grew 4.6% organically in the period driven by selective price increases in certain regions, partly offset by higher tax on sales.

COGS per hectoliter decreased organically once again (-15.7%) on a per hectoliter basis as a result of our currency and aluminum hedges, lower PET prices year over year and productivity gains, partly offset by general inflation and higher sugar hedges in the period.

SG&A excluding depreciation and amortization decreased 4.5% in the period despite higher volumes and higher accruals for variable compensations due to the timing of certain investments that were concentrated in the first quarter.

CSD & Nanc Brazil Normalized EBITDA increased by +53.3% reaching R\$296.5 million in the quarter, with year-to-date organic growth reaching 30.9%.

HILA-ex volumes increased by 1.1% in Q2 2009 as a result of good performance in our soft drinks business while beer volumes continue to be challenged by the adverse economic scenario.

Net Revenue per hectoliter was up +15.1% due to better pricing in the period while COGS per hectoliter increased by 1.1% on an organic basis, driven by general inflation almost completely offset by our productivity gains.

SG&A excluding depreciation and amortization decreased by 3.3% organically in the period as a result of strong fixed cost savings.

HILA-Ex Normalized EBITDA delivered EBITDA losses of R\$9.9 million in Q2 2009, an improvement of R\$20.8 million versus Q2 2008.

Second Quarter 2009 Results
August 13, 2009
Page 11

Latin America South (LAS) - Quinsa

Our countries in the region continue to face either significant industry volume slowdown or negative volume growth in the period. LAS delivered Normalized EBITDA amounting to R\$341.1 million in the quarter with impressive organic growth of 37.3% and margin expansion of 590 bps to 42.9%. Our results in the region continue to be driven by strong revenue management and fixed cost savings in the period, partly offset by soft volumes and labor inflation pressures.

Beer volume organic decline of 0.7% reflects either lower growth or declining industry volumes across the Quinsa markets as a result of the impact of a challenging economic environment. We continue to be able to mitigate the impact of industry slowdown by growing market share within the region through leading marketing initiatives and increased innovations.

Net revenues per hectoliter grew 22.1% in the period driven by price increases in line with inflation, revenue management initiatives and good performance of innovations, together with strong performances from our premium brands.

COGS per hectoliter increased 11.6% in the period, which is below the level of inflation as we were able to offset general inflation and higher personnel-related costs with higher productivity in our plants.

SG&A excluding depreciation and amortization increased 20.6% organically in the period, driven by general inflation, and higher personnel-related expenses, partly offset by ZBB savings.

Quinsa Beer Normalized EBITDA increased 34.6% in the quarter totaling R\$280.6 million.

CSD & NANC volumes in Quinsa declined in the period driven by lower industry volumes in Argentina, compensated by strong volume growth in Uruguay.

Organic growth in net revenue per hectoliter of 20.0% was driven by price increases in line with inflation implemented during 2009, together with revenue management initiatives.

COGS per hectoliter increased 11.0% organically, which is below the level of inflation as we were able to offset general inflation and higher cost of sugar and labor with lower PET prices and higher productivity in our plants.

SG&A excluding depreciation and amortization increased 10.1% in the period as we continue to partly offset higher sales and general inflation with ZBB savings.

Quinsa CSD & Nanc Normalized EBITDA increased 51.9% in the period totaling R\$60.4 million.

Total volumes increased +2.3% versus Q2 2008 as domestic volumes increased 2.6% driven by industry growth of 1.9% and by market share gains of 10 bps.

Net revenues per hl increased by 3.5% in Q2 2009 due to year over year price increases ahead of inflation and better product mix driven by innovation.

COGS per hl increased by 8.3% on an organic basis driven by higher sales of imports and increased commodity prices due to currency, partly offset by fixed cost savings in the period.

SG&A excluding depreciation and amortization declined by 10.4% organically in the period due to lower fixed cost and improved efficiency of our commercial investments. Timing of certain investments that will take place in the second half of the year also contributed to this decline.

Labatt's Normalized EBITDA increased by 14.1% in Q2 2009 to R\$545.7 million with margin expanding by 330 bps in the period.

August 13, 2009
Page 15

Other Operating Income, net

Other operating income, net totaled R\$118.8 million in Q2 2009 compared to R\$97.9 million in Q2 2008. The main reason for this increase was tax credits recorded by the Company during this quarter.

Other Operating income, net	2Q09	2Q08	YTD 09	YTD 08
-----------------------------	------	------	--------	--------

R\$ million

Government grants	56.0	62.0	111.1	120.6

Page 16

Net Financial Results

AmBev's net financial result decreased from R\$320.8 million to R\$ 249.4 million in Q2 2009 driven by lower net interest expenses in the period.

This decrease is mainly a result of retirement of certain debt which matured during the period and were not renewed.

Breakdown of Net Financial Results	2Q09	2Q08	YTD 09	YTD 08
R\$ million				
Interest income	37.6	26.9	70.8	56.1
Interest expenses	(206.9)	(293.4)	(488.0)	(558.7)
Gains (losses) on derivative instruments	25.6	16.6	(80.3)	8.3
Gains/(losses) on non-derivative instruments	(65.4)	(38.8)	(2.2)	(43.3)
Taxes on financial transactions	(9.4)	(10.1)	(24.4)	(28.0)
Other financial expenses, net	(30.9)	(22.1)	(50.0)	(32.4)
Net Financial Results	(249.4)	(320.8)	(574.2)	(598.0)

Debt Breakdown	June 2009			December 2008		
	Current	Non-current	Total	Current	Non-current	Total
Local Currency	1,123.8	2,229.9	3,353.8	2,883.2	1,579.7	4,462.9
Foreign Currency	687.9	4,717.0	5,404.9	705.0	5,489.9	6,194.9
Consolidated Debt	1,811.7	6,946.9	8,758.6	3,588.2	7,069.6	10,657.8

Cash and Equivalents	4,278.4	3,298.9
Short-Term Investments	2.6	0.1
Net Debt	4,477.7	7,358.9

The Company's total debt decreased from R\$10,657.8 million in December 2008 to R\$8,758.6 million in Q2 2009, as a result of the payment of certain debt which matured in the period, namely our promissory notes with Banco do Brasil amounting to approximately R\$1.7 billion on April 13. At the same time, during June we obtained around R\$400 million from BNDES to support our investments in Brazil such as our new Minas plant.

On July 1, we paid about R\$0.8 billion in debt related to our Debentures 2009 while beginning July 31, we paid around R\$745 million in dividends and IOC to our shareholders.

We have also declared additional dividends and IOC distribution to our shareholders totaling around R\$1.0 billion which will be paid beginning October 2.

Page 17

Provision for Income Tax & Social Contribution

Our weighted nominal tax rate was 32.7% compared to 33.1% in Q2 2008. The effective tax rate in Q2 2009 was 21.6% compared to last years' rate of 24.0%. The main reason for this improvement was higher government grants on income tax recorded during the period partly offset by other tax adjustments.

The table below shows the reconciliation for income tax and social contribution provision.

Income Tax and Social Contribution	2Q09	2Q08	YTD 09	YTD 08
R\$ million				
Profit before tax	1,775.8	1,395.9	3,894.7	2,939.0
Adjustment on taxable basis				
Non-taxable net financial and other income	(125.0)	(44.8)	(451.5)	(140.4)
Non-taxable intercompany dividends	(0.3)	(0.0)	(0.6)	(0.0)
Government grant related to sales taxes	(56.0)	(63.0)	(111.1)	(125.1)
Expenses non-deductible for tax purposes	127.4	27.4	363.9	56.6
	1,721.8	1,315.5	3,695.4	2,730.1
Aggregated weighthed nominal tax rate	32.7%	33.1%	32.4%	33.3%
Taxes – nominal rate	(562.2)	(435.7)	(1,198.8)	(909.4)
Adjustment on taxes expenses				
Government grant on income tax	78.8	27.7	110.7	55.4
Tax savings from tax credits (interest attributed to shareholders')	85.9	77.2	173.2	166.6
Tax savings from goodwill amortization on tax books	38.1	37.0	76.1	73.4
Dividends withholding tax	(10.9)	(4.4)	(17.3)	(11.0)
Other tax adjustment	(13.6)	(37.1)	(34.0)	(33.7)
Expense on income tax	(383.9)	(335.4)	(890.1)	(658.7)
Effective tax rate	21.6%	24.0%	22.9%	22.4%

Minority Interest

Minority interests in subsidiaries totaled R\$16.4 million in Q2 2009 compared to R\$34.5 million in Q2 2008. The reduction in the expense is due to an adjustment to minority interest recorded in Q2 2008. Year to date, our minority interest expenses increased from R\$25.7 million to R\$40.3 million due to higher profits from Quinsa's subsidiaries which are not wholly owned.

Net Income

AmBev posted a net income of R\$1,375.6 million in the period compared to R\$1,026.0 million last year. The main reason for this increase are better operating results across all our businesses as well as lower net financial expenses and lower effective tax rate in the period.

Page 18

Reconciliation between Normalized EBITDA and Net income

Both Normalized EBITDA and EBIT are measures utilized by AmBev's management to demonstrate the Company's performance.

Normalized EBITDA is calculated excluding from Net Income the following effects: (i) Minority interest, (ii) Income Tax expense, (ii) Share of results of associates, (iv) Net Financial Results, (v) Non-recurring items, and (vi) Depreciation & Amortization.

Normalized EBITDA and EBIT are not accounting measures under accounting practices in Brazil, IFRS or the United States of America (US GAAP) and should not be considered as an alternative to Net Income as a measure of operational performance or an alternative to Cash Flow as a measure of liquidity. Normalized EBITDA and EBIT do not have a standard calculation method and AmBev's definition of Normalized EBITDA and EBIT may not be comparable to that of other companies.

Reconciliation - Net Income to EBITDA	2Q09	2Q08	YTD 09	YTD 08
Net Income - AmBev holders	1,375.6	1,026.0	2,964.2	2,254.6

Recent Events

On July 22, 2009, CADE, the Brazilian antitrust authority, ruled on the Administrative Proceeding No. 08012.003805/2004-1 involving AmBev. This proceeding was initiated in 2004 as a result of a complaint filed by Schincariol, and has as its main purpose the investigation of the Company's conduct in the market, mainly related to our customer loyalty program named *Tô Contigo* (which is similar to airline and other mileage programs).

During its investigation, Secretariat of Economic Law of the Ministry of Justice ("SDE") concluded that the program should be considered anticompetitive in the absence of certain adjustments, which have already been substantially incorporated into the Program under its current configuration. In addition, there was no suggestion of fines in the SDE opinion. After the SDE opinion, the proceeding was sent to CADE, which issued a ruling that among other decisions, determined a fine for R\$352 million.

The Company intends to challenge the decision in Brazilian courts. Based on the advice of our counsel, we understand the likelihood of loss to be possible (but not probable), and therefore have not accrued for this amount in our interim financial statements.

Q2 2009 EARNINGS CONFERENCE CALL

Speakers	João Castro Neves <i>Chief Executive Officer for AmBev</i> Nelson Jamel <i>CFO and Investor Relations Officer</i>
Language	English
Date	August 13 th , 2009 (Thursday)
Time	11:00 (Brasília time) 10:00 (EST)
Phone number	US / International Participants +1 (412) 858-4600
Code	AmBev

Please call 15 minutes prior to the beginning of the conference call. The conference call will also be transmitted live through the Internet on the website www.ambev-ir.com.

The conference call replay will be available on AmBev's website around two hours after the conclusion. To access the replay of the conference through phone, please dial +1(706) 645-9291; code: 83875467.
