AMBEV REPORTS 2011 SECOND QUARTER RESULTS UNDER IFRS

São Paulo, August 11, 2011 – Companhia de Bebidas das Américas – Ambev [BOVESPA: AMBV4, AMBV3; and NYSE: ABV, ABVc] announces today its results for the 2011 second quarter (Q2 2011). The following financial and operating information, unless otherwise indicated, is presented in nominal *Reais* and prepared in accordance with International Financial and Reporting Standards (IFRS), and should be read in conjunction with our quarterly financial information for the three and six months period ended June 30, 2011 filed with the CVM and submitted to the SEC.

This press release segregates the impact of organic changes from those arising from changes in scope or currency translation. Scope changes represent the impact of acquisitions and divestitures other than those eliminated from the base, the start up or termination of activities or the transfer of activities between segments, curtailment gains and losses and year over year changes in accounting estimates and other assumptions that management does not consider as part of the underlying performance of the business. Unless stated, percentage changes in this press release are both organic and normalized in nature. Whenever used in this document, the term "normalized" refers to performance measures (EBITDA, EBIT, Profit, EPS) before special items. Special items are either income or expenses which do not occur regularly as part of the normal activities of the Company. They are presented separately because they are important for the understanding of the underlying sustainable performance of the Company due to their size or nature. Normalized measures are additional measures used by management and should not replace the measures determined in accordance with IFRS as indicators of the Company's performance. Comparisons, unless otherwise stated, refer to the second quarter of 2010 (Q2 2010). Values in this release may not add up due to rounding.

OPERATING AND FINANCIAL HIGHLIGHTS

Top line performance: Net sales grew 6.2% driven mainly by price increases across our regions, with Net Revenue/hl growing 7.1% in the period. Organic volume decrease of 0.9% across the regions except for HILA-ex.

Cost of Goods Sold (COGS) and Selling, General & Administrative (SG&A) expenses: COGS/hl increased by 9.3% mainly due to raw materials and packaging costs as well as lower fixed cost dilution, which were partly offset in the quarter by gains in currency hedges. SG&A (excl. depreciation & amortization) increased by 1.6% mainly as a result of general inflation and higher logistic costs partially offset by lower provision for variable compensation and cost savings initiatives.

EBITDA, Operating Cash generation and Profit: Our Normalized EBITDA reached R\$ 2,583.6 million in Q2 2011, an organic growth of 9.0%, while margin continued to further expand (+110bps) reaching 44.5% in the period. Cash generated from operations in Q2 was R\$ 2,589.3 million, a 1.4% increase as compared to same 2010 period. Our Normalized Profit was R\$ 1,837.3 million (+20.4%), while our Normalized Earnings per share (EPS) grew 20.1%.

Payout and Financial discipline: We announced in the quarter a R\$ 1.26 billion payment in dividends and interest on own capital (IOC), paid on Aug 5th, totaling R\$ 3.06 billion payout year to date.

SUMMARY

During the second quarter 2011 our normalized consolidated EBITDA totaled R\$ 2,583.6 million, a 9.0% organic increase, while our consolidated volumes decreased by 0.9% as a result of negative volume growth in Brazil, Canada and LAS partially offset by our volume performance in HILA-ex.

In Brazil, beverage industry was soft due to a tougher comparison against Q2 2010 volume, which was helped by the FIFA World Cup, and due to a poor weather in May and June. Our beer volume decreased 2.6% in the quarter mainly impacted by a 160 market share loss yoy (despite 110bps share increase on a sequential basis since February) mainly driven by a higher price gap to our competitors. Our CSD volume grew 1.3% with a 10 bps of market share gain. Our Normalized EBITDA in Brazil increased by 9.9% in the quarter with margins expanding 240 bps.

"Our results in Brazil show our ability to deliver profitable growth despite the short term negative volume scenario. We were able to increase our EBITDA margin mainly as a result of our pricing strategy and cost management initiatives", says João Castro Neves, Chief Executive Officer (CEO) for Ambev.

Regarding Beer Brazil top line, despite a price premium to competitor's brands above historical averages we still achieved the third best market share average ever for a second quarter and have been consistently gaining market share since February with brand preference scores improving constantly. Innovation remains a key priority to push further our market share and brand preference and, as part of our 2011 pipeline, we will launch Budweiser in Brazil at the end of this month.

HILA-ex reported a volume growth of 10.6% and a negative EBITDA of R\$ 9.5 million in the quarter. João Castro Neves comments: "In HILA-ex we are focused on increasing market share in the region as well as on pursuing a better profitability in the medium term".

Latin America South contributed with Normalized EBITDA of R\$ 328.1 million in the period, posting solid organic EBITDA growth ratios in both beer and soft drinks in spite of poor market performance in soft drinks and cost pressures. "We reached a 20.0% EBITDA growth in the quarter based on revenue management initiatives and support to our portfolio, focusing on Stella Artois and our mainstream brands in each country despite increasing pressures in raw materials and labor costs. The overall beer market is recovering while we achieved market share gains in the region", says Bernardo Paiva, CEO for Latin America South.

In Canada, Labatt delivered Normalized EBITDA of R\$ 414.6 million in the quarter, registering an organic decrease of 3.0% mainly because of marketing investments phasing. "The second quarter was one of relative stability for Labatt, characterized by an improvement in the industry trend and marginal upsides in both market share and net revenue. A key contributor to this stability was the positive evolution of our brand health indicators, which was coupled with higher investments behind our focus brands", says Bary Benun, Labatt's President.

"Overall, we had a quarter in which we registered important margin expansion in order to compensate for a lower revenue growth driven by a softer industry in most regions where we operate. We are also adjusting our cost base for a tougher year in volumes, without compromising our long term goals", says João Castro Neves, CEO for Ambev.

Looking towards the rest of the year, we expect that Brazil EBITDA margin may further improve as we benefit from favorable comps versus 2010 due to the concentration of the impact of imported cans on Beer COGS in the second half of last year, with our full year COGS/hl expected to be in line with inflation. Additionally, margins may expand as a result of the continued decrease of extra logistics costs in the 2nd semester of 2011 as compared to 2010.

We believe that the short term industry softness may revert as we approach 2012 and start to benefit from stronger disposable income resulting from the expected increase of minimum wage in Brazil early next year by 7.5% in real terms. Therefore, the announced plan to invest up to R\$ 2.5 billion in Brazil remains on track and we have already invested approximately R\$ 1.4 billion year to date.

Ambev Brazil

Our Brazil business unit delivered normalized EBITDA of R\$ 1,850.4 million in the quarter, representing an organic growth of 9.9% and a margin expansion of 240 bps to 47.6%.

Our performance in Brazil for the second quarter 2011 showed margin expansion in both Beer and Soft Drinks businesses despite negative volume growth driven by poor weather and beer market share losses versus last year. Revenue growth came mainly from price increases while COGS increase was primarily due to higher raw material and packaging costs as well as lower fixed cost dilution. SG&A, excluding depreciation and amortization, was impacted mainly by general inflation and higher logistics costs, which were more than offset by cost savings initiatives and lower provision for variable compensation.

Our beer volumes in Brazil posted organic volume contraction of 2.6% during Q2 2011 driven by industry decline combined with a lower average market share in the quarter (-160 bps versus last year despite +110bps on a sequential basis since February) as we opened our price gap to our competitors.

Net Revenue/hl increased 8.1% in Q2 2011 mainly due to our price increases and a higher direct distribution weight, which were partially offset by higher taxes, mainly excise taxes.

COGS/hl increased by 8.9% in the quarter due to higher raw materials and packaging costs (mainly aluminum) as well as lower fixed cost dilution due to negative volume growth, partially offset by currency gains and easier comparison on imported cans from 2Q10.

SG&A, excluding depreciation and amortization, decreased by 1.2% in the period due to general inflation and higher logistic costs which were more than offset by lower provisions for variable compensation and cost savings initiatives.

Beer Brazil normalized EBITDA increased by 10.9% reaching R\$ 1,563.0 million in the quarter.

Our CSD & Nanc Brazil volume increased 1.3% as a result of soft industry growth and some market share gains.

Net Revenues/hl decreased 1.9% organically in the period, in which price increases were not sufficient to offset excise tax increases.

COGS/hl grew by 4.5% due to higher aluminum and PET resin prices, partially offset by currency gains.

SG&A, excluding depreciation and amortization, decreased 16.6%, mainly as a result of lower provision for variable compensation and phasing of marketing expenses, partially offset by higher logistics costs.

CSD & Nanc Brazil normalized EBITDA increased by 4.9% and reached R\$ 287.5 million in the quarter.

HILA-ex volumes increased 10.6% in Q2 2011 as a result of industry growth and market share gains in most countries in which we operate.

Net Revenue per hectoliter was up 4.3% due to price increases in line with inflation for the Region.

COGS/hl decreased by 0.9% in the quarter mainly as a result of lower packaging costs.

SG&A, excluding depreciation and amortization, increased 8.6% in the quarter due to higher volumes and general inflation.

HILA's normalized EBITDA increased R\$ 3.7 million organically in the quarter.

Scope changes in HILA-ex relate to the Venezuela transaction that took place in October 2010.

Latin America South (LAS)

Our LAS operation improved its beer volume performance as a result of industry growth in most of our operations and market share gains throughout the Region. We are also achieving better results in our soft-drinks business in spite of increasing cost pressures and a strong contraction in the industry. We have achieved an organic EBITDA growth of 20.0% and a consolidated EBITDA of R\$ 328.1 million in the quarter, while our EBITDA margin reached 39.8%.

Beer volumes grew organically 2.9% in the quarter, reflecting industry recovery in most of our markets. We gained market share in the region with strong communication and support to our mainstream and premium brands.

Net Revenue/hl grew 22.1% in the quarter driven mainly by price increases in line with inflation for the Region.

COGS/hl increased 21.7% in the period as a result of higher costs of malt, labor and packaging materials.

SG&A, excluding depreciation and amortization, increased 26.4% in the quarter driven by general inflation, higher personnel-related expenses and a strong marketing support to our brands.

LAS Beer EBITDA increased 18.3% in the quarter totaling R\$ 290.1 million.

CSD & Nanc volumes in LAS decreased 4.7% in the period driven mainly by industry contraction.

Net Revenues/hl registered an organic growth of 33.1% in the quarter, as a result of price increases and effective trade spend management.

COGS/hl increased by 33.8% in the quarter mainly as a result of higher sugar, PET resin and labor costs as well as general inflation.

SG&A expenses, excluding depreciation and amortization, increased 15.5%, mostly as a result of personnel and transportation costs, general inflation and investments behind our brands.

LAS CSD & Nanc normalized EBITDA increased organically 33.3% in the quarter totaling R\$ 38.1 million.

Second quarter volumes decreased by -1.7%, impacted by a drop in beer industry volumes and a decrease in export sales. We estimate a 10 bps market share gain versus the prior year and have maintained the stable share position established over the past five quarters.

Net Revenue/hl grew +0.1% as price increases were offset by the final cycling of an Ontario tax change in 2010 while COGS/hl increased +0.6% in the quarter compared to the same period last year.

SG&A, excluding depreciation and amortization, grew 3.5% in Q2 as we partially offset a significant marketing investment increase, which relates to the timing of our investments versus last year, by savings in our fixed cost base.

Normalized EBITDA decreased by 3.0% in the quarter totaling R\$ 414.6 million and resulting in an EBITDA margin compression of 70 bps.

The scope change reported in Canada refers to the phasing out of contracted volume supplied to NAB (North American Brewers) in connection to the grant of the perpetual license for Labatt branded beer for sale exclusively in the USA.

Other operating income/(expenses)

Other operating income increased R\$ 44.4 million in the quarter basically as a result of higher government grants in Brazil and tax provision reversals.

Other operating income/(expenses)	2Q10	2Q11	YTD10	YTD11
R\$ million				
Government grants	88.6	92.2	171.7	191.3
Tax recovery	2.7	2.9	9.1	2.9
(Additions to)/reversals of provisions	(1.1)	19.1	(9.1)	16.3
Net gain on disposal of property, plant and equipment and intangible assets	5.1	3.1	3.5	5.2
Net other operating income	21.9	44.2	35.9	81.1
	117.1	161.5	211.1	296.8

Special items

Special items totaled R\$ 4.8 million in Q2 2011 compared to R\$ 15.2 million net losses in Q2 2010, while the year to date results are mainly explained by the Labatt Hamilton brewery closure expenses and by restructuring costs.

Special items	2Q10	2Q11	YTD10	YTD11
R\$ million				
Restructuring	(14.3)	(4.8)	(31.8)	(5.3)
Labatt Hamilton Brewery closure expenses	(1.0)	-	(47.1)	-
Others	0.1	-	(2.7)	-
	(15.2)	(4.8)	(81.6)	(5.3)

Net finance results

Ambev's net finance result improved by R\$ 80.1 million in Q2 2011 mainly because of: (i) lower net interest expenses, and (ii) gains with respect to derivative instruments which relate to the results of our ongoing hedging policy.

Net finance results <i>R\$ million</i>	2Q10	2Q11	YTD 10	YTD 11
Interest income	91.4	148.1	171.8	259.3

Net Debt			(207.1)			(686.1)

Provision for income tax & social contribution

Our weighted nominal tax rate was 32.3% in the period compared to 32.5% in Q2 2010, while the effective tax rate in Q2 2011 was 16.3% compared to Q2 2010 rate of 22.2%. The difference between both quarters is mainly due to an increase in the income taxes incentives, higher IOC payment and other tax adjustments.

The table below shows the reconciliation for income tax and social contribution provision.

Income tax and social contribution <i>R\$ million</i>	2Q10	2Q11	YTD 10	YTD 11
Profit before tax	1,964.4	2,204.0	4,176.9	4,911.9

Other tax adjustments	6.4	91.1	(0.8)	134.7
Income tax and social contribution expense	(436.5)	(358.3)	(998.1)	(960.2)
Effective tax rate	22.2%	16.3%	23.9%	19.5%

Non-controlling interest

Non-controlling interest in subsidiaries corresponded to a total expense of R\$ 13.1 million in Q2 2011 compared to an expense of R\$ 17.7 million in Q2 2010.

Profit

Ambev posted a profit of R\$ 1,832.6 million in the Q2 2011 compared to R\$ 1,510.2 million during the same period last year, an increase of 21.3%. Excluding special items, our net profit increased by 20.4% to R\$ 1,837.3 million due to higher EBITDA, better net finance results and lower effective tax rate.

Reconciliation between normalized EBITDA and profit

Both Normalized EBITDA and EBIT are measures used by Ambev's management to measure the Company's performance.

Normalized EBITDA is calculated excluding from Profit the following effects: (i) Non-controlling interest, (ii) Income Tax expense, (iii) Share of results of associates, (iv) Net finance results, (v) Special items, and (vi) Depreciation & Amortization.

Normalized EBITDA and EBIT are not accounting measures under accounting practices in Brazil, IFRS or the United States of America (US GAAP) and should not be considered as an alternative to Profit as a measure of operational performance or an alternative to Cash Flow as a measure of liquidity. Normalized EBITDA and EBIT do not have a standard calculation method and Ambev's definition of Normalized EBITDA and EBIT may not be comparable to that of other companies.

Reconciliation - Profit to EBITDA	2Q10	2Q11	YTD 10	YTD 11
Profit - Ambev holders	1,510.2	1,832.6	3,160.4	3,921.2
