AMBEV REPORTS 2011 THIRD QUARTER RESULTS UNDER IFRS

São Paulo, November 9, 2011 – Companhia de Bebidas das Américas – Ambev [BOVESPA: AMBV4, AMBV3; and NYSE: ABV, ABVc] announces today its results for the 2011 third quarter (Q3 2011). The following financial and operating information, unless otherwise indicated, is presented in nominal *Reais* and prepared in accordance with International Financial and Reporting Standards (IFRS), and should be read in conjunction with our quarterly financial information for the three and nine months period ended September 30, 2011 filed with the CVM and submitted to the SEC.

This press release segregates the impact of organic changes from those arising from changes in scope or currency translation. Scope changes represent the impact of acquisitions and divestitures other than those eliminated from the base, the start up or termination of activities or the transfer of activities between segments, curtailment gains and losses and year over year changes in accounting estimates and other assumptions that management does not consider as part of the underlying performance of the business. Unless stated, percentage changes in this press release are both organic and normalized in nature. Whenever used in this document, the term "normalized" refers to performance measures (EBITDA, EBIT, Profit, EPS) before special items. Special items are either income or expenses which do not occur regularly as part of the normal activities of the Company. They are presented separately because they are important for the understanding of the underlying sustainable performance of the Company due to their size or nature. Normalized measures are additional measures used by management and should not replace the measures determined in accordance with IFRS as indicators of the Company's performance. Comparisons, unless otherwise stated, refer to the third quarter of 2010 (Q3 2010). Values in this release may not add up due to rounding.

OPERATING AND FINANCIAL HIGHLIGHTS

Top line performance: Net sales grew 10.6% driven mainly by price increases, with Net Revenue/hl growing 7.5% in the period. Our organic volumes increased 2.9% across regions.

Cost of Goods Sold (COGS) and Selling, General & Administrative (SG&A) expenses: COGS/hl increased by 4.5% mainly due to raw materials and packaging costs, which were partly offset in the quarter by gains in currency hedges. SG&A (excl. depreciation & amortization) increased by 7.3% mainly as a result of general inflation, higher commercial and logistics expenses, partially offset by cost savings initiatives.

EBITDA, Operating Cash generation and Profit: Our Normalized EBITDA reached R\$ 2,952.8 million in Q3 2011, an organic growth of 13.5%, while margin continued to further expand (+110bps) reaching 46.3% in the period. Cash generated from operations in Q3 was R\$ 3,420.8 million, a 32.9% increase as compared to same 2010 period. Our Normalized Profit was R\$ 1,645.4 million (-9.5%), while our Normalized Earnings per share (EPS) declined 9.9%.

Payout and Financial discipline: We announced in the quarter a R\$ 2.35 billion payment in dividends and interest on own capital (IOC), to be paid on Nov 18th, totaling R\$ 5.43 billion payout year to date.

SUMMARY

During the third quarter 2011 our normalized consolidated EBITDA totaled R\$ 2,952.8 million, a 13.5% organic increase, with our consolidated volumes increasing by 2.9% as a result of positive volume growth across the regions.

In Brazil, beverage industry presented a better volume growth after a World Cup tough comparison. Our beer volume increased 1.7% in the quarter mainly impacted by a better industry and also due to a 150 bps market share increase since the beginning of the year. Our CSD volume grew 6.4% with 70 bps of market share gain. Our Normalized EBITDA in Brazil increased by 13.3% in the quarter with margins expanding 150 bps.

"Our performance in Brazil shows we took the right decisions to deliver cost management savings, keeping our pricing strategy and being able to benefit from an improvement in the industry volume growth", says João Castro Neves, Chief Executive Officer (CEO) for Ambev.

We will keep our focus on the North and Northeast regions after implementing our capex plans that lead to a capacity expansion in 4 plants in the region and a new brewery in Pernambuco. We also continue to focus in the premium segment, with the successful launch of Budweiser in Brazil and the strong execution and positive trends of Stella Artois. Innovation and productivity remain our priorities to improve our brands health indicators while generating funds to invest in the market and connect with consumers.

HILA-ex reported a volume growth of 12.6% and a negative EBITDA of R\$ 12.7 million in the quarter. João Castro Neves comments: "In HILA-ex we are focused on increasing market share in the region as well as on pursuing a better profitability over time".

Latin America South contributed with Normalized EBITDA of R\$393.0 million in the period, posting solid organic EBITDA growth ratios in both beer and soft drinks, in spite of soft volume growth, mainly in CSD, and cost pressures. "Despite increasing pressures in raw materials and labor costs, we reached a 24.7% EBITDA growth in the quarter based on revenue management initiatives and support to our portfolio, focusing on Stella Artois and our mainstream brands in each country. The overall beer market is recovering while we kept stable market share throughout the region", says Bernardo Paiva, CEO for Latin America South.

In Canada, Labatt delivered Normalized EBITDA of R\$ 439.0 million in the quarter, registering an organic increase of 6.2% mainly because of better net revenue performance. "Labatt had a strong third quarter, characterized by an improvement in the industry trend and an increase in net revenue, while maintaining cost of goods in line with 2010. A key contributor to this growth was our stable market share trend combined with the strong pricing discipline in a very competitive marketplace", says Bary Benun, Labatt's President.

"Overall, we registered an important margin expansion in the quarter after adjusting our costs and delivered a double digit EBITDA growth with increased volume", says João Castro Neves, CEO for Ambev.

Looking towards the last quarter of the year, we expect to deliver a higher EBITDA growth than this quarter supported by further EBITDA margin expansion as well as benefitting from an easier comparison in SG&A and also in the COGS per hectoliter line, which is still expected to be in line with inflation for the full year.

Moving into 2012, we also expect to benefit from stronger disposable income resulting from the anticipated increase of minimum wage in Brazil early next year by 7.5% in real terms, which should push the industry to higher growth rates. The announced plan to invest up to R\$ 2.5 billion in 2011 in Brazil remains on track, with approximately R\$ 2.1 billion invested year to date.

Ambev Brazil

Our Brazil business unit delivered normalized EBITDA of R\$ 2,133.5 million in the quarter, representing an organic growth of 13.3% and a margin expansion of 150 bps to 49.0%.

Revenue growth came from price increases and volume growth, while COGS per hl increase was primarily due to higher raw material and packaging costs. SG&A, excluding depreciation and amortization, was impacted mainly by general inflation and higher commercial and logistics costs, which were partially offset by lower administrative costs.

Our beer volumes in Brazil posted organic volume expansion of 1.7% during the quarter mainly driven by a better industry and also due to a 150 bps market share increase since the beginning of the year.

Net Revenue/hl increased 8.4% in Q3 2011 mainly due to our price increases and a higher direct distribution weight, which were partially offset by higher taxes.

COGS/hl increased by 4.1% in the quarter due to higher raw materials and packaging costs, partially offset by currency gains and easier comparison on imported cans from 2010.

SG&A, excluding depreciation and amortization, increased by 6.0% in the period due to general inflation and higher logistics and marketing expenses, partially offset by lower administrative costs.

Beer Brazil normalized EBITDA increased by 14.8% reaching R\$ 1,802.0 million in the quarter.

Our CSD & Nanc Brazil volume increased 6.4% in Q3 2011 as a result of industry growth and 70 bps market share gains.

Net Revenues/hl increased 1.3% organically in the period driven by price increases, partially offset by tax increases and a negative mix impact.

COGS/hl declined by 2.4% due to currency gains and favourable sugar hedges in the quarter, partially offset by higher packaging costs (mainly PET resin).

SG&A, excluding depreciation and amortization, increased 15.6%, mainly as a result of general inflation, logistics costs and phasing of commercial expenses, partially offset by lower administrative costs.

CSD & Nanc Brazil normalized EBITDA increased by 6.1% and reached R\$ 331.5 million in the quarter.

HILA-ex volumes increased 12.6% in Q3 2011 as a result of industry growth and market share gains in most countries in which we operate.

Net Revenue per hectoliter was up 4.8% due to price increases in line with inflation.

COGS/hl increased by 1.6% in the quarter mainly as a result of general inflation, partially offset by lower packaging costs.

SG&A, excluding depreciation and amortization, increased 23.4% in the quarter mainly due to general inflation and higher logistic costs.

HILA-ex's normalized EBITDA decreased R\$ 6.2 million organically in the quarter.

Scope changes in HILA-ex relate to the Venezuela transaction that took place in October 2010.

Latin America South (LAS)

Our LAS operation improved its beer volume performance as a result of industry growth, mainly in Argentina, and stable market share throughout the region. We are also achieving better results in our soft-drinks business in spite of increasing cost pressures. We have achieved an organic EBITDA growth of 24.7% and a consolidated EBITDA of R\$393 million in the quarter, while our EBITDA margin reached 41.8%.

CSD & Nanc volumes in LAS increased 1.7% in the period driven mainly by industry growth is most of our operations and the launching of the Twister brand in Argentina, a non carbonated flavored water.

Net Revenues/hl registered an organic growth of 31.7% in the quarter, mainly as a result of price increases.

COGS/hl increased by 25.7% in the quarter mainly as a result of higher sugar, PET, juices and labor costs as well as general inflation.

SG&A expenses, excluding depreciation and amortization, increased 22.9%, mostly as a result of personnel and transportation costs, general inflation and investments behind our brands.

LAS CSD & Nanc Normalized EBITDA increased organically 85.7% in the quarter supported by 620 bps of margin expansion totaling R\$59.3 million.

Third quarter volumes decreased by 0.1% versus 3Q10 as a result of a 20 khl decrease in export sales while our domestic market share has continued the stabilization trend over the prior six quarters.

Net Revenue/hl grew 1.8% through strong price discipline while COGS/hl decreased 2.9% in the quarter compared to the same period last year.

SG&A, excluding depreciation and amortization, declined by 2.7% in Q3 due to the timing of our marketing investments versus last year and also due to savings in our distribution cost base.

Normalized EBITDA increased by 6.2% in the quarter totaling R\$ 439.0 million and resulting in an EBITDA margin expansion of 190 bps.

The scope change reported in Canada refers to the phasing out of contracted volume supplied to NAB (North American Brewers) in connection to the grant of the perpetual license for Labatt branded beer for sale exclusively in the USA.

Net finance results

Ambev's net finance result worsened by R\$ 354.4 million in Q3 2011 mainly due to unrealized foreign exchange translation losses on intercompany payables and loans following the BRL depreciation. Considering the nature of these operations (intercompany payables and loans), the non-cash currency translation impact is reported in the income statement. This impact is economically offset by the foreign exchange translation gains on offshore companies (reporting in USD and CAD) that are registered in equity.

Provision for income tax & social contribution

Our weighted nominal tax rate was 32.4% in the period compared to 32.7% in Q3 2010, while the effective tax rate in Q3 2011 was 26.7% compared to Q3 2010 rate of 22.0%. This increase was mainly due to a difficult comparison with 3Q10 because of one off tax benefits we had last year. The year to date decrease in the effective tax rate is mainly due to an increase in the income taxes incentives and other tax adjustments in 2011. We expect to deliver an effective tax rate for the full year in line with the previous year.

The table below shows the reconciliation for income tax and social contribution provision.

Non-controlling interest

Non-controlling interest in subsidiaries corresponded to a total expense of R\$ 16.6 million in Q3 2011 compared to an expense of R\$ 12.5 million in Q3 2010.

Profit

Ambev posted a profit of R\$ 1,687.3 million in the Q3 2011 compared to R\$ 1,815.2 million during the same period last year, a decrease of 7.0%. Excluding special items, our net profit decreased by 9.5% to R\$ 1,645.4 million due to higher EBITDA, more than offset by higher net finance costs and higher effective tax rate.

Reconciliation between normalized EBITDA and profit

Both Normalized EBITDA and EBIT are measures used by Ambev's management to measure the Company's performance.

Normalized EBITDA is calculated excluding from Profit the following effects: (i) Non-controlling interest, (ii) Income Tax expense, (iii) Share of results of associates, (iv) Net finance results, (v) Special items, and (vi) Depreciation & Amortization.

Normalized EBITDA and EBIT are not accounting measures under accounting practices in Brazil, IFRS or the United States of America (US GAAP) and should not be considered as an alternative to Profit as a measure of operational performance or an alternative to Cash Flow as a measure of liquidity. Normalized EBITDA and EBIT do not have a standard calculation method and Ambev's definition of Normalized EBITDA and EBIT may not be comparable to that of other companies.
